

A club player within County meath has set up an on line survey to collect peoples views on fixture planning within the county. He is looking for the views from clubs/players around the county.

I am a club football player in County Meath and have set up an online survey for players in order to get their opinions on Fixture Planning in the County. I would also welcome comments/experiences from other Counties. There is an opportunity in the survey for all people, with interests associated with GAA games and fixtures planning, to express their opinions on how fixture planning affects them or their clubs. The link for this survey is below.

The primary aim of the survey is to capture objectively how Fixture Planning affects players at club level and to communicate the results to all interested parties. Fixture Planning is a crucial issue within the GAA and affects everyone no matter what level they are involved at.

I am asking you to make players in your club aware of this survey through your usual communication channels and to possibly complete the survey yourself which will take no more than 3-5 minutes. It is only to do with Fixture Planning and any other issues including comments of a personal or defamatory nature will be disregarded.

The link to the survey is;
